Open to hybrid and remote roles. Dedicated software engineer with 2+ years of hands-on experience in full-stack development using diverse tech stacks, including but not limited to JavaScript, React.js, Node.js, HTML, CSS, SQL, Express.js and Agile methodologies. Recognized as a standout Software Engineering Teaching Assistant at BrainStation, mentoring students and leading coding challenges. Demonstrated expertise in end-to-end project lifecycle, leveraging tools like Git and GitHub. Holds a Software Engineering diploma and is a Certified Scrum Master (CSM). Proficient in RDMS, OAuth, JWT, and rapid application development.

EXPERIENCE

Sept 2023 – Dec 2023, Toronto ON
Teaching Assistant Software Development, BRAINSTATION
- Nominated for the role of Teaching Assistant by the lead educators from a cohort of 12 based on outstanding performance in technical proficiency, leaderships skills, communication and interpersonal skills and emotional intelligence.
- Leading coding challenges and troubleshooting across diverse tech stacks, including React, Node.js, CSS, HTML, JavaScript, SCSS, Knex.js, Express, Git, and GitHub, while mentoring 10+ students with rigorous code reviews for skill enhancement.
- Facilitating daily stand ups, overseeing end-to-end student projects, performing code reviews, and grading submissions using industry best practices, with tools like Git and GitHub.
- Serving as the primary academic contact for students, providing one on one guidance and support, and facilitating a collaborative learning environment to enhance coding proficiency and soft skills.
- Collaborating with lead instructors to assess student performance and formulating strategies to enhance areas of improvement for students.

Nov 2022 – Jun 2023, Hamilton ON
Software Developer, AAJIMATICS INCORPORATED
- Performed daily standups with team members for updates on project assignments.
- Learned Java and Spring boot.
- Executed feature updates and bug fixes on existing projects.

Sept 2022 – Nov 2022, Lagos NG
Junior Software Engineer, BELDORE TECHNOLOGIES
- Communicated with team members on project requirements.
- Worked closely with the UI/UX team to gain a comprehensive understanding of the project's framework.
- Implemented front-end designs using industry best practices with HTML, CSS, and React.js.

Apr 2022 – Sept 2022, Hamilton ON
Software Developer, AAJIMATICS INCORPORATED
- Collaborated with team members in gathering requirements for projects.
- Participated in daily standups with team members for updates on project assignments.
- Executed feature updates and bug fixes and pushed them to the version control platform.
